UTILITY DEPARTMENT

Important Update:
Power Cost Adjustment Coming in October

Starting with your October billing statement, you will see a new line item on your monthly electric bill titled **Power Cost Adjustment (PCA)**.

What is the Power Cost Adjustment?

The PCA reflects real-time market changes in the wholesale cost of purchasing electricity, fuel, and transmission. Instead of frequently changing core base rates, the PCA keeps pricing fair and transparent by adjusting monthly to reflect actual market conditions.

[-] Monthly Credit

When power supply costs are lower than baseline projections, the PCA appears as a credit, **reducing** your monthly bill.

[+] Monthly Debit

When power supply costs rise above baseline projections, the PCA appears as a small charge, **adjusting** the bill to cover true supply costs.

Sample Monthly Bill Calculation

This sample illustrates how a PCA credit line item appears on a typical residential bill (Example usage: 800 kWh):

Line Item Description	Usage	Rate / Unit	Total Charge
ELECTRIC (kWh Energy Charge)	800 kWh	$0.077582	$62.07
POWER COST ADJUSTMENT (PCA)	800 kWh	-$0.00229	**-$1.83**
Net Electric Power Cost			**$60.24**

Questions? We're Here to Help!
